

LOITERING MUNITIONS · LOITERING MUNITION, SHORT RANGE

Mudamir SR

Man-portable loitering munition for rapid, precise close-combat strike.

MISSION ROLE	RANGE	ENDURANCE	PAYLOAD	LAUNCH	RECOVERY
Close-combat interdiction	Confidential	Confidential	Confidential	Man-portable rail launcher	Expendable (terminal engagement)

SYSTEM OVERVIEW

Mudamir SR is a short-range precision-strike loitering munition engineered to deliver rapid-response engagement in highly dynamic tactical environments. Designed for close-combat operations, it provides a fast, flexible, and highly accurate solution for neutralizing time-sensitive and high-priority targets.

Mudamir SR is suited for close-range battlefield interdiction and precision strike against time-sensitive targets. An advanced AI-enabled guidance and control system enables autonomous target detection, tracking, and engagement with minimal operator input.

TECHNICAL SPECIFICATIONS

Performance

Speed	35 m/s
Range	Confidential
Altitude	1,000–1,500 m
Endurance	Confidential
Propulsion	Electric

Physical & Warhead

Wingspan	3.0 m
Length	0.8 m
Weight	Confidential
Warhead	Confidential

Guidance & Operability

Flight phase	GNSS guided
Targeting	AI dataset target identification
Wind / Rain	Level 6 / 6 mm
Temperature	–10 °C to 60 °C

KEY CAPABILITIES

- AI-enabled autonomous target detection & engagement
 - Precision terminal attack with low collateral damage
 - Compact & man-portable for rapid ground-force deployment
- Low radar signature
 - Cost-effective vs. traditional guided missiles
 - Multi-environment operation: sea, desert, high-altitude
